FARM DEVELOPMENT PROJECTS**

Infrastructure Development Projects

involves Public-Private-Partnership projects such as,

- Building roads, bridges, and highways
- Commissioning of electrical transmission lines
- Construction of buildings – residential, commercial and industrial properties
- Other heavy civil infrastructure

Pre-construction

facilities such as ready-mix concrete, stone mining, stone crusher, and brick production units are owned and operated by Alpenglow.

Mining

Our Services have what it takes to make those big rocks not so big. We specialize in Drilling & Blasting Services for construction, aggregate and mining industries. (Iron ore and Bauxite)

- Quarry Drilling & Blasting services

we have conducted blasting for companies which include excavating and highway contractors, quarries, developers, and general contractors.

- Trench Blasting services

for utility pipeline construction, including gas lines, water lines, electric, storm sewers, sanitary sewers, telephone service, and more.

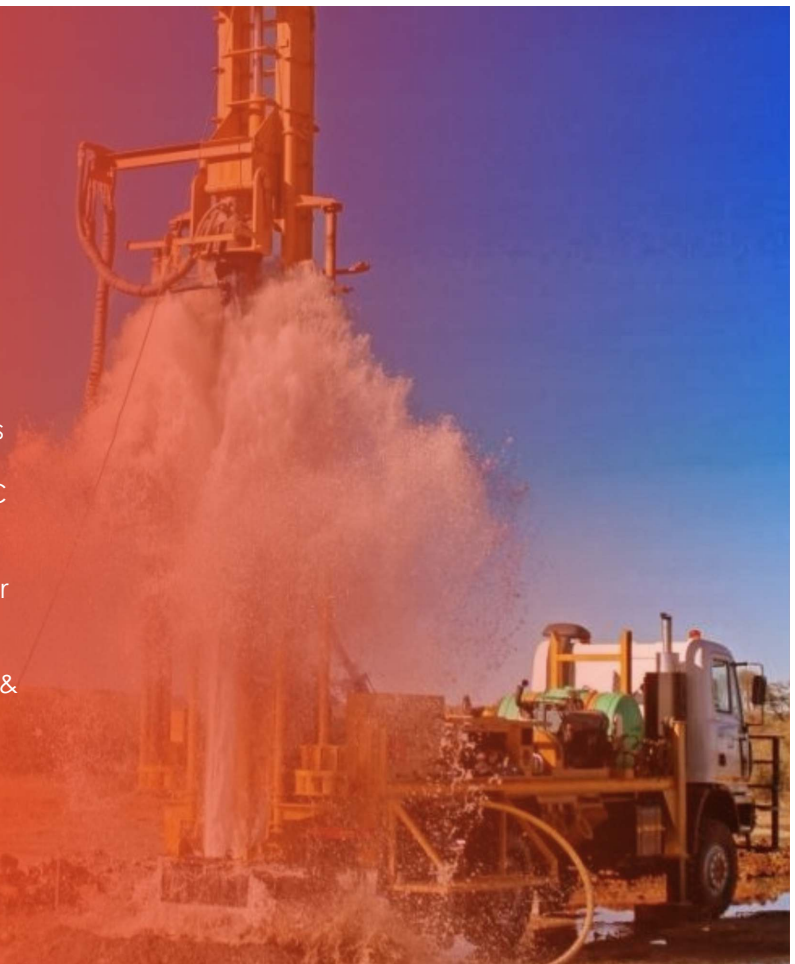

Water Projects include,

- Water supply and treatment plants
- Effluent treatment plant and disposal system
- Leak detection and rectification work
- Industrial and educational institutional water supply schemes
- Rural and urban water supply schemes (surface water and underground water)

Borewell services:

- Commission of boreholes for underground water extraction in rural and urban areas
- Siting - Identifying sites for the drilling of the boreholes
- Drilling
 - Making a choice on the type of drilling (DTH/Rotary)
 - Drill diameter 4"-14" boreholes
 - Drilling depths up to 800 meters
- Borehole development – Equipping the borehole with PVC pipes, screens, gravel, making sanitary seals with bentonite and cement to prevent surface water infiltration thereby not contaminating the aquifer
- Well Development, Air lift, Pump & Yield testing
- Water quality analysis
- Choice of Hand pumps/ installation of pumps (Manual/Electric/Solar)

Promotion of Agriculture and farm development projects

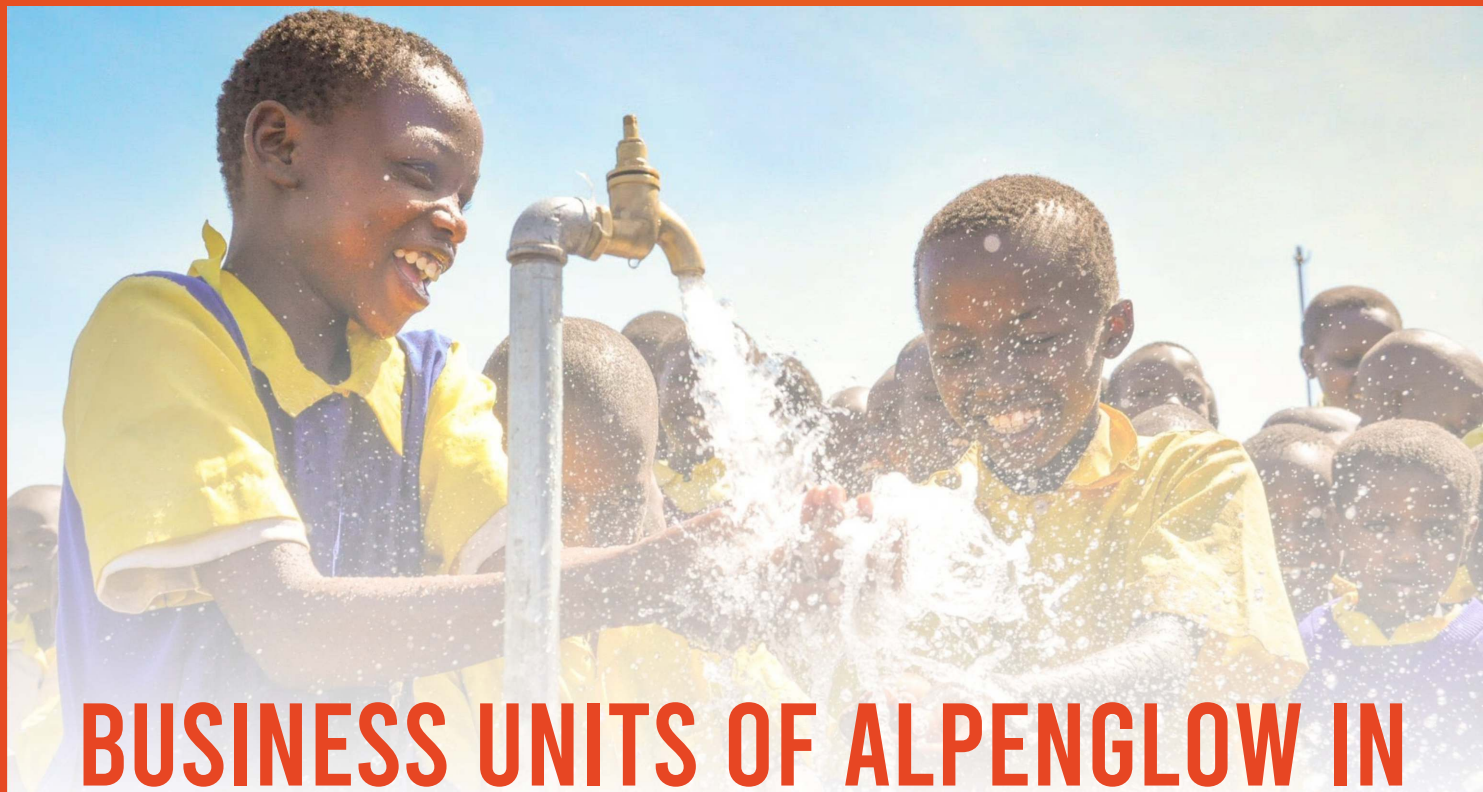

This includes undertaking farmland and cultivating seasonal crops, to uplift the position of the farmers and, derive utility of the fertile land.

Trading Overseas

Trading of essential products, mainly to and from Africa, and other parts of the world are handled. It also includes export of heavy engineering machinery and equipment.
